DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 33, 34, 68, 69 and 71-85, drawn to ALF or SALF polypeptides and fusion proteins, classified in class 530, subclass 358.
- II. Claims 35-67 and 70, drawn to an isolated polynucleotide encoding a ALF or SALF polypeptide, fragments thereof, vectors and host cells comprising said polynucleotide and methods of expressing said polynucleotide, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the ALF or SALF polypeptides of Group I, and the nucleic acid encoding the ALF or SALF polypeptides of Group II each comprise a chemically unrelated structure capable of separate manufacture, use and effect. The peptides of Group I are comprised of amino acid sequence and the DNAs of Group II are comprised of nucleic acid sequence. The DNA has other utility besides encoding protein such as a hybridization probe, and the proteins can be made synthetically. Additionally, the protein can be used to perform specific biological function(s) which are independent of production of antibodies.

Art Unit: 1652

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
